

EXPERIENCE YOU CAN COUNT ON

Our Injury Prevention and Worksite Wellness team is among the most experienced in our industry. We provide consulting services to identify priorities and provide the tools employers need to implement sustainable programs and procedures. Our team delivers a range of services to promote a proactive approach to reducing workplace hazards. We focus on safety and risk assessment while supporting wellness. In partnership with the employer we successfully advance safety initiatives at each point along the journey.

THE A.I.M. MUTUAL APPROACH

Partnership: Broad Based Consulting

- Identify key decision-makers who share responsibility and accountability for developing detailed service plans
- Provide custom recommendations using root cause analysis in the event of major losses
- Deliver targeted assistance based on employer needs and exposures

Putting Wellness in its Place

- Present simple tools to assess wellness needs and interest to ensure each program is tailored to the workplace and industry
- Select resources to engage employees in wellness programming

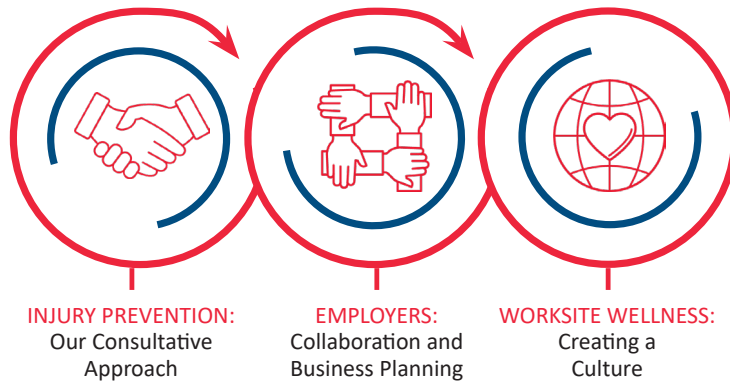

Performance: Policyholder Metrics

- Set specific metrics to monitor the progress of business plans against expected outcomes
- Propose services beyond the hazard or actual loss by examining contributing factors
- Create a client-focused strategy and plan of action

Collaboration: Training and Sustainability

- Present need-based training with clearly defined objectives, outcomes and performance metrics
- Support a “Train the Trainer” model designed to instill sustainability and cultural buy-in
- Determine training programs by working with the employer’s key decision-makers

EXPANDING OUR CONSULTATIVE APPROACH

Injury Prevention & Worksite Wellness (IPWW) brings our proactive initiatives in workers' compensation insurance management to employers. Other contributing factors often affect a worker's recovery time and drive up the cost of workers' compensation. IPWW brings it all together for employers, providing targeted resources to prevent injuries and improve return to work rates when injuries do occur.

Top Benefits of Effective Workplace Safety Programs

IMPLEMENTING a safety & health program

can help employers avoid the

INDIRECT COSTS that result from

WORKPLACE INCIDENTS

such as

TIME LOST due to work stoppages and investigations, **training and other costs associated with REPLACING INJURED WORKERS** and **LOSS OR DAMAGE** to material, machinery and property.

These **INDIRECT COSTS** have been estimated to be at least **2.7** times the **DIRECT COSTS**

--Recommended Practices for Safety & Health Programs, OSHA

OUR INITIATIVES IN PRINT

A.I.M. Mutual developed an innovative program which goes far beyond typical injury prevention programs... This holistic approach is the future of intelligent risk management in workers' compensation insurance.
