January 11, 2023 - How to Prepare for an OSHA Inspection / Consultation Service

Presented by: Joe Green, Compliance Assistance Specialist and **Merrill MacInnis**, Compliance Assistance Specialist

January 18, 2023 - OSHA Recordkeeping

Presented by: Andy Palhof & Insurance WC Manager

January 25, 2023 - "OSHA's Best Kept Secret" OSHA Small Business Consultation Program

Presented by: OSHA consultation team

This presentation is an opportunity for small businesses in New England to understand the information and services the Consultation programs provide.

February 1, 2023 - Hand Safety Programs

Presented by: Matthew Geandreau, Superior Glove

February 8, 2023 - Developing Psychological Safety @ Work

Presented by: Shannon Prescott, CWCA, COSS, The Richards Group

Increasingly, organizations have come to understand that one of the true keys to organizational wellness and business success is increasing the level of Employee Engagement within their organizations. We also know that people work better when their physical safety is being watched after. In this session, we will dive deeper and look at the most critical factor in employee engagement, better performing teams and increased retention rates: Psychological Safety & Wellness. Learn what diverse industries such as airlines, healthcare, nuclear power operators and companies like Google have found: organizations with higher levels of psychological safety have more engaged, more empowered and more connected employees. In this interactive, fast-paced session, we will learn what psychological safety is and why it matters to your employment practices. Attendees will leave with six key take-away skills that are applicable and crucial in any organization.

Shannon is the Director of Risk Control of The Richards Group, serving Business Insurance clients with employment practice compliance and safety program evaluation and implementation, helping them achieve compliance with OSHA, DOT and DOL regulations. In addition, she provides First Aid/CPR courses and Mental Health First Aid courses.

Shannon is a licensed Property & Casualty Producer, a Certified WorkComp Advisor, a Certified Occupational Safety Specialist and is an Authorized OSHA Outreach Trainer for General Industry and Construction courses. Shannon serves on the Stone Soup Café Board, the VT Safety & Health Council, her local Youth Commission and is also an active member of the Massachusetts based, Franklin County Young Professionals, currently serving as the organization's Chairperson.

February 8, 2023 - TBD

February 15, 2023 - PPE ANSI updates to the SRL Standard and Head Protection

Presented by: Cesar Ahumada, Sales Solutions Inc

March 1, 2023 - Robotics

Presented by: Scott Patrick Smith CSP, MS, L.PD, Tighe & Bond

Program Description: This program will explore key applications in industrial automation best for deployment of collaborative robotics. We will take a look at what makes these robots collaborative to allow for use alongside operators. Lastly, we will review additional software safety features to implement and steps that can be taken for integrating additional safety devices.

Steve Swanick is a BSME out of the University of New Hampshire. 9 years in the industry supporting Automation efforts for Motion and Robotic solutions.

Scott is a board-Certified Safety Professional (CSP) specializing in the development of data driven safety management systems, safety education, and policy development. He earned a Master of Science in Industrial Hygiene at the University of Massachusetts Lowell, a Doctor of Law and Policy evaluating Occupational Safety at Northeastern University in Boston and drives to improve the safety community as an OSHA Outreach trainer. Scott has worked across the America's, Canada, Europe, and Asian managing safety and health. He devotes time to research and has published peer reviewed articles addressing industrial hygiene and safety training. Scott's career goals are driven towards exploring and streamlining safety policy, education, and supporting the success of health and safety professionals.

March 8, 2023 - Health & Safety Plans

Presented by: Sean Akell, ai motion

This presentation is for anyone interested in information on Site Specific Safety and Health and Safety Plans. This presentation will outline regulatory structures, content, format, and readdress the critical nature of applying plans in both hazardous waste and construction environments. It begins with a regulatory structure review that outlines where plans are required and where they are used. A discussion on state-to-state regulatory variances is presented. Next, general information and a breakdown of potential content is evaluated. Building off this foundation, topics including training, state and federal level regulatory impacts, and implementation and ownership are discussed. Finally, a selection of resources on how, where, and what to include in a SSSP or HASP are presented with links to public site locations.

March 15, 2023 - Means of Egress/Exits

Presented by: Robert Hunt

March 22, 2023 - Mold Awareness

Presented by: Laura Bonk and Brianna Ham, RFP Environmental

Mold or fungi is around us. Some indoor mold will cause health issues for building occupants. This webinar will review:

1. Understanding of Fungi
2. Causes of Fungal Contamination
3. Prevention of Fungal Contamination
4. Recognition of Fungal Contamination
5. Evaluation of Fungal Contamination

Ms. Ham is an environmental scientist and project manager with RPF Environmental. She has over 10 years of experience in environmental health and safety consulting. She currently specializes in projects related to environmental investigations, indoor air quality, mold surveys and remediation, industrial hygiene assessments and a variety of asbestos concerns. She is a certified microbial inspector in addition to a licensed asbestos project monitor and inspector. Ms. Ham's duties include, in part, site inspections and implementation of sampling strategies, oversight of remediation work, compliance audit and inspections, laboratory field work, optical microscopy, reporting and review. Ms. Ham holds a science degree from the University of New Hampshire.

Ms. Bonk is an environmental health and safety engineer and project manager with RPF Environmental. She has 25 years of experience with consulting firms, manufacturing and construction

Bringing business together to network and share ideas in the occupational safety and health community.

companies, and university facilities. She currently specializes in environmental health and safety audits, training, written plans, on-site support and worker exposure assessments. Ms. Bonk holds science, engineering, and management degrees from Stanford University, Massachusetts Institute of Technology, and the University of New Hampshire.

March 29, 2023 - Personal Liability
Presented by: Amy Cann, McClane Middleton
